by Kimberly-Clark Professional™

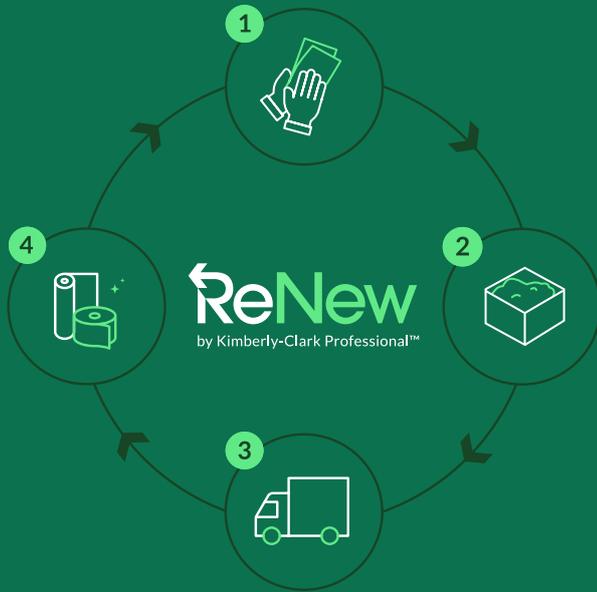

Closing the loop with ReNew by Kimberly-Clark Professional™

We're committed to reducing waste sent to landfill or incineration. That's why we created the ReNew™ Programme. Instead of sending used products like hand towels and old dispensers to landfill or incineration, these are collected from your business and are recycled into new consumer goods.

Our closed loop solution for hand towel recycling

The ReNew™ Programme is an innovative closed loop service that transforms the way you dispose of your hand towels.

How does it work?

- 1 Used hand towels are separated from general waste at point of use.
- 2 Hand towels are collected and taken to an aggregation site for compression and baling.
- 3 Bales of hand towels are transported to a Kimberly-Clark mill.
- 4 New paper products are created and sent out to customers.

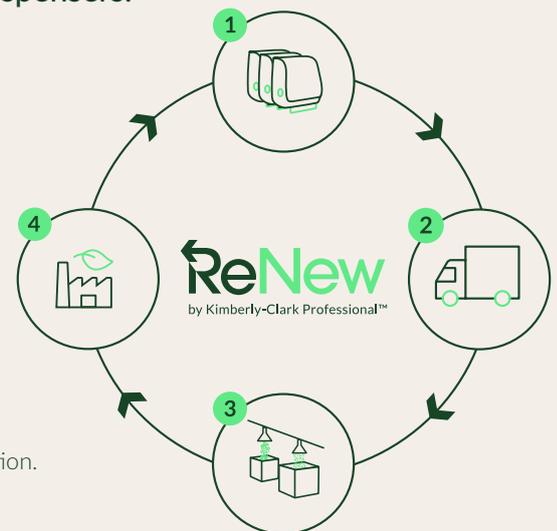

Our hassle-free dispenser recycling solution

Our professional fitters will remove, collect and collate your old dispensers – no matter who the manufacturer is – and install new, hygienic and sustainable dispensers.

How does it work?

- 1 Fitter collates unwanted dispensers.
- 2 Dispensers are sent to recycling partner.
- 3 Plastic shredded into pellets, cardboard baled, metal screws reused or melted down.
- 4 Re-use: Raw materials back into production process and diverted from landfill or incineration.
